Background

The data presented in this data dictionary were collected through the 2011 Survey of State Mental Health (MH) Agencies. This survey is part of a larger study conducted by the Vocational Rehabilitation - Rehabilitation Research and Training Center (VR-RRTC) at the Institute for Community Inclusion at the University of Massachusetts Boston. The Center is funded by the National Institute on Disability and Rehabilitation Research and the Rehabilitation Services Administration. This survey was part of a larger effort to collect data on the characteristics of state VR agencies and how they work with other federal, state, and local agencies that provide employment services for people with disabilities. This survey was reviewed and approved by the Council of State Administrators of Vocational Rehabilitation (CSAVR).

DATA COLLECTION METHODS

The 2011 Survey of State Mental Health Agencies was distributed between June 20 and September 26, 2011. The survey was sent to the MH agency director(s) in each state, as well as the District of Columbia, and the territories (American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands). The survey was completed by directors MH agencies. Directors (or their designee) were asked to respond on behalf of their entire state / territory. The survey was administered online.

SAMPLE

Of the 55 Mental Health Agencies, 30 agencies responded to the survey. This resulted in a 54.55% response rate. Two agencies opted out of the survey.

RESERVED CODES

Value labels for all variables are included in the data dictionary. Consistent across all variables are the following values and codes:

-9	MISSING
-7	NOT ASKED

DATA DICTIONARY STRUCTURE

Each entry in the data dictionary includes the survey item (or variable name), data type (NUM or CHAR), variable. Each entry also includes a variable position, which refers to the location of the variable in the dataset.
